

Welcome to the Loremaster Alpha

What is Loremaster?

Loremaster is an AI-assisted narrative scribe for tabletop role-playing games. It listens to your play sessions, turns them into searchable knowledge, and helps players and Game Masters stay focused on the story. By just uploading an audio recording, Loremaster will transcribe your session to power features such as:

- Generating session summaries in different styles
- Keeping track of open plot lines
- Tracking different NPCs, Locations, Factions, and other events in your world
- Generating fun portraits or session posters
- Answering players' questions about the story so far

Most importantly, Loremaster is not meant to replace your creativity—it's here to support and preserve it.

Why an Alpha?

We're still in the early stages of development. This alpha test is meant to help us understand how Loremaster works in real play, uncover what's useful, and learn what needs improvement.

Why me?

We're running a **small, private alpha** with a handful of trusted friends and early supporters. Loremaster isn't ready for public preview yet, since we're still polishing rough edges and figuring out what really matters at the table. You're here because we value your perspective as a player or Game Master.

What We're Asking of You

- **Make audio recordings** of your play sessions (they don't have to be recorded through Loremaster).
 - For in-person sessions, we recommend recording from a centrally-placed phone or laptop.

- For virtual sessions, we can recommend recording applications to use with your preferred platform (e.g. Discord).
- **Use Loremaster** during your games and see how it fits into your style.
- **Share feedback** on what's working, what's not, and what you'd love to see next.
- **Tell us about your experience:** Was Loremaster helpful? Did it save time? Was anything confusing?

What You Can Expect From Us

- Regular updates as we improve the system.
- A feedback loop: we'll listen closely to your input.
- Clear communication about data use (see our *Alpha Data Use Policy* for details).

FAQs

Do I need to change how I run my game?

No. Loremaster is meant to fit into your table, not replace it. Just record your sessions and we'll handle the rest.

What happens to my data?

Your recordings, transcripts, and campaign info are private. Only our small development team can access them, and only for debugging and improvement (see our *Alpha Data Use Policy* for details).

Is this free?

Yes, the alpha is completely free to use.
